

1/10 Capra 1.9 4WS Unlimited Trail Buggy RTR Rear Steering Information

Want to get the most out of your new Capra 4WS's rear steer capabilities?

With the help of the mixing function found in the Spektrum array of DX5 transmitters (DX5 Rugged, DX5C, DX5 PRO), you can now control both servos by simply choosing your "mix" and steering normally! This makes for a realistic and easy to operate 4-wheel-steering solution. Want to max-out your steering control and FUN? Get the DX5 PRO and use the Proportional auxiliary control for fully proportional steering of the rear wheels separately from the standard front wheel control.
